

INTERNATIONAL INFORMATION SOFTWARE

Diploma: International Master in Business Studies, 1st year

Description: During these 18 hours, get to know about how to structure and orchestrate projects within an IT department of a large international corporation:

- 1 - staffing: how to spread your workforce between different locations (offshoring) + in-house /outsourcing
- 2 - IT infrastructure: where to host your software solutions between public and private clouds
- 3 - Agile: while each product now includes a digital dimension, get familiar with software project management following Agile principles (Scrum, lean, Kanban)
- 4 - Data management: while data are the secret trove of any large corporation, get to know how to collect, store and harvest these data. Data, Analytics and Machine Learning will allow any large corporation to succeed in their digital transformation.
